

■ **Project Profile:**
New Shop Frontages and Access, Russell & Dorrell's
Worcester

Architects

- The Practice gained planning permission for the change of use of the upper floors of this former headquarters building from offices to retail. This allowed Russell & Dorrell's to open their new furniture store in this prominent location.

The Practice's designs for new disabled access from the rear car park and new shop fronts to both the front and rear make a striking first impression and contribution to the streetscape.
