Case Study: Rabjohns LLP

- We were asked to create a contemporary and stylish new office environment for the award winning Worcester based accountancy, business and tax advisory firm, Rabjohns LLP.

We delivered a stunning new office design that complements Rabjohns' professional image, impresses clients and provides a high quality and adaptive space for the firm's staff. As well as having a definite "wow" factor, we also incorporated new features, such as a gym, to help the workers look after their health.

Working with the client to understand their business, we were able to create a space that caters to how they function. The space delivers the best mix of open plan and private office space to enable different types of working, highly specified meeting space and a front of house space that sets the right tone with their clients. We achieved all this whilst releasing over 30% of their existing space, allowing them to significantly reduce their overheads.
